## BACKGROUND

Following the cancellation of end of key stage assessments in 2020, due to Covid-19, the Performance, Intelligence and Policy team ran an optional data collection. The following analysis is based on the teacher assessed judgements submitted by schools.

## COVERAGE / VALIDITY OF DATA

At the time of production, a total of 104 Nottinghamshire primary phase schools opted to take part in one or more end of key stage returns. These outcomes were shared with other local authorities conducting similar collections via NCER (National Consortium for Examination Results - a local authority community interest company) in order to produce a national average.

The following 2020 Nottinghamshire and national averages contained within this document are based on:

## Green Header (2020 data)

The data on this page is based on 2020 partial school reported data. It uses aggregated LA and national data as detailed in the table above.

## Blue Header (2019 final)

The data on this page is based on 2019 data. It uses final LA and national averages from all schools.

## Orange Header (2019 edited)

The data on this page is based on 2019 data for those schools who returned 2020 data (please note national averages are still based on all schools). It provides a direct 'like for like' comparison.

Shows the range of results for schools in the LA (excluding special schools) for this subject / measure in the stated assessment year (2017 in this example). Broadly the same number of schools ( $20 \%$ or a fifth) are placed in each segment The lowest ranked school scored 33.3 and the highest school scored 100. This school features in the second quintile (second fifth) for this measure which is identified by the blue box. Schools in the second quintile scored between 60.0 and 67.2 The value in the blue box (65.2) is the schools outcome.

Shows outcomes for pupil groups within the school for this subject / measure in the latest assessment year (2017 in this example). The pupil groups are ordered with the highest performing group at the top and lowest towards the bottom. Any group(s) with no pupils will appear at the bottom of the list (identified by the 0 in brackets SEN, BME and EAL in this example). Caution should be used when interpreting outcomes of small groups.
